1For the Cynthiana News. TO MARY-FOR SOME FLOWERS.

I thank thee, Mary, for thy gift of fair and fragrant flowers, The ha rbingers of summer days, And sumny gilded hours; I thank the e for the gentle thought-Which makes the gift to me, More precious than the richest gems Tirat lie beneath the sea.

I love th ose little blushing things That spr. ing beneath our feet, Scattering the ir incense on the air, In odours rich and sw cel; Hueing with rays o. l.ving light The green and velve't sod; Whisp'ring to us of Hope' and L'eaven, Of Happiness and Gop.

The bright, free gift, that come; alike Unto the rich and poor; That springs not more in palace walks Than by the peasant's door: That to the weary wayfarer, For many lengthy miles, With gayest bloom and sweet perfume The tiresome way beguiles.

How truly do they teach our hearts. (However great, or small,) HE. who in beauty fashioned them, Careth alike for ALL: They whisper to the mourner, Hope-

And point beyond the tomb, To where their own transplanted flow'rs In Eden's bowers bloom. Yes, Mary, thou hast chosen well-

In many an after day, When their bright hues have faded all, Their fragrance passed away; Sweet Mary, and her floral gift, Shall rise before my mind, With all the dear and treasured things In memory enshrined. HIRWYLL. JUNE, 1855.

The Seltzer Well.

Having recently visited this remarkthis place, -we have thought that some account of its character, and properties might not be uninteresting, and might be useful to some of our readers.

Although this water has suddenly attained a great local celebrity, we believe that no detailed account of it has ever been published. It is not a little singular that such should have been the case,

The effervesence, -or we should rather say the Boiling of this water, as it liberates its carbonic acid, -is gotten up on a scale that renders the performance of all similar fountains very small affairs indeed. It is just simply impossible to institute a comparison between it and any of the earbonated waters of America. To those who have not seen it we do not know how to describe its appearance in the well otherwise than by saying, it very nearly resembles the most violent very hot fire.

After taking up a goblet of the water, every part of it within the glass is completely filled with very minute globales of free carbonic acid gas. These globules are of a silvery whiteness, and rising slowly through the water for a minute, impart to it the most brilliant and beautiful appearance conceivable.

From its effervesence alone it has been called Seltzer water, but it is not, we imagine very far from being identical in three thousand dollars—one-third invest- history of that Church. character with the celebrated well so ed in a farm, and the remainder in catcalled in Germany.

That well we believe contains free carbonie acid, and very little of any other Gascons or mineral ingredients, and consequently is merely a tonic remedy, slow and often imperceptible in its action .--The water however acts very differently, active mineral water we ever saw, or ever heard of: and that is more remarkable still, regarding the use of so powerful an agent, its effect has been almost

universally beneficial.

The cure of a chronic case of dyspepsia, is a serious undertaking by ordinary modes of treatment, yet we ourselves, know of more than one case, of from seven to ten years standing, which do actually seem to be cured by the use of these waters alone, and there are very many of our citizens, who profess themselves greatly benefitted by their use, in discase of the digestive organs. We could and we we would give a more detailed account of some of these cases, if for them, that the facts, to which we have alluded are of common notoriety in this county, and any further information concerning them can be easily obtained.

Either this is a most wonderful fountain of health, or else a very large number of intelligent persons have deluded themselves into a belief of imaginary cures effected upon their own persons. Our own confidence in its virtues, is as him,) and is stirring up the minds of the firm as it can be, and we have no doubt people, awakening them to their best inthis well will some day render our town terests—greatly to the annoyance of the triumphant."—[Brownson's Quarterly Review. as great a place of summer resort, as any old line politicians. WATERLOO, (Clark co.) Mo., ?

May 25, 1855. FRIEND MOREY:-In pursuance of a promise to you and many friends, to give you a description of the part of Missouri in which I stop; I, according to the best of my ability, give you what I know of Clark county; its claims upon emigration, situation, facilities for agriculture, fertility of its soil, climate, health of its citizens, &c. Situated as it is at the norththe north and Illinois on the south,bounded on two sides by free States, it has consequently not improved so rapidfact that southern men who owned slaves would not come here, because they would be too close to two free States, while Illinois; and it was irom these circumstances that this portion of Missouri has, until within the lest few years, been settled only by men without capital, though things have now taken a more happy change. Enterprising men seeing lands of the very best soil and having facilities for transportation greatly superior to others which were selling for double prices asked for lands in this county, have made investments, and lands which two years ago sold for two and two-and-aable fountain of Mineral Water, situated half dollars per acre, are now selling for upon the farm of R. H. Ford, Esq., near five dollars, and those which are improvacres which can be bought for five dolsmall per cent. upon its value.

Mr. Epiton:-- | sent i vse'f to address Buur- ed necessary .- Lou. Journal. bon's No. 2 to the News; since my last many have been the conjectures among the Sag-Nichts as to who was its author; I at none of Sam's boys knew. It has been thou at by some that could the author he discovered, the note da fe of the Sag-Nichts would be put in operation -in the exercise of the guilletine argument. Oaths and anathemas have been uttered against the individof ancient democracy We propose in No. 2 to notice the difference between Romanism and tents of the Romish Church : but it is a strict were in the South. subversion of the term, and is very inaptly applied. Therefore, the Romish Church is not Catholic. The word Catholic implies liberal, not bigoted; and thus we say, Catholic, or tiberal principles. But the Romish is not a liberal Church, and therefore is not Catholic. Has not the Romish Church universally denounced those of an opposite faith as heretics! Where do we find the very root, galland butterness of bigutry? Where is an institution in which the blood stains of persecution to al! other creeds are so plainly discernable. Travel back to the horrifying scenes of the Inquisition, and see if you cannot find Revelations fulfilled:

"And I saw the woman drunken with the blood of the Saints, and with the blood of the martyrs of Jesus; and when I saw her, I wondered with great admiration." Now who can doubt that this verse is a direct Revelation of those cruelties exercised by the Romish Church against all it denominates heretics. But 1st and Key West on the 7th inst. again, who is this "Mystery, Babylon the Great, the Mother of Harlots, and abominations of the carth?" Certainly the Africa. Romish Church, for truly she is a mystery of iniquity. Babylon the great, the ancient city, it is well known, was noted for idolatry and cruelty; and the Romish Church is an exact ante-type of the ancient Babylon. Go into her churches and see her devotees howing before images, and worshipping the saints, instead of the Gon of them. She affects the name of the Holy Mother Church; but is indeed the "inother of harlots, and abominations of the earth." The Romish Church has in the most shameful manner abounded in blasphemous appellations, and have arrogated to themselves her. the most sacred titles; and her priesthoo! even applied names to themselves which belong only to God; for God has said that he "will not give his glory to another, neither his praise to graven images.' Poperv is a power exercised by a monarch called a Pope over the religious denomination known as Roman Catholics. and extends so far that the subjects of this domineering Pentiff believe that they owe more allegiance to his Papal under which they reside; and were he in conclave to issue an edict for a public revolt, they would undertake it all hazards, consoling themselves that if death be their fate they died as GLORIous Martyrs. The Pope has the power demand the presence of his Bishops and Prelates at Rome, and there to imprison them in dungeons. But has the U.S. government power to do this, of which they may be sworn subjects? and supposing a Methodist or Episcopal Bishop. in conducting their ministerial operations, were to incur the censure of their respective churches, and be excommunicated, would the government of the U S. have any power guaranteed constitutionally or morally, to take and confine that person in a prison? There are a great many in the country who have line watches, and are at a lass to know where to send them to be repaired, because there are so many watches spoiled by persons that profess to be watch-markers. To such he would say, that although he has been a citizen of Krufucky howeveral years, he learned his trade in one of the largest manufactories in England, which gives him a decided advantage over most others, in that line.
